LENGTH AND LETTER COMBINATION. VOCABULARY OF FIRST
DECLENSION NOUNS

Samarkand State Medical University

English Teacher of the Department of Languages

Scientific Leader, Abdusalimov Sukhrob Rustamovich,

The 1 st year Student of International Faculty,

Muhammad Faizan

Abstract. In this article it is explained about the Latin 1st declension nouns that considered as group of nouns that follow a specific pattern of inflection. The authors analyze nouns that are typically feminine and nominative singular form. Nouns are declined to indicate their grammatical function in a sentence, such as whether they are the subject, object, or possessive.

Key words: nouns, official language, scholars, Latin words, feminine, fundamental.

Introduction. The Latin language, literature, science, and law are only a few of the areas in which it has a considerable influence today.

Even after the Roman Empire collapsed, Latin continued to be vividly used. It was the official language of the Roman Empire. Throughout the Middle Ages and beyond, it served as the universal language of scholars, intellectuals, and the Catholic Church. Numerous contemporary languages, particularly those in the Romance language family including Italian, Spanish, French, Portuguese, and Romanian, have been strongly affected by Latin.

Main body: Nouns that are normally feminine and finish in -a in the nominative singular form make up the first declension of Latin words. These nouns have specific ends in each of the following cases:

The noun's fundamental singular form, usually ending in -a.

As in *puella* (girl).

Genitive Singular: Usually ends in -ae and indicates possession or origin.

Puellae (of the girl), for instance.

Dative Singular: Usually ends in -ae; indicates indirect object or “to/for” someone.

For instance, *puellae* (to/for the girl).

Accusative Direct object in the singular, usually ending in -am.

For instance, *puellam* (girl)

Ablative Singular: Denotes a way or a means; usually ends in -.

For instance, *puell* (by, with, or from the female)

Multiple subjects are indicated by the nominative plural, which typically ends in -ae.

For instance, *puellae* (girls)

Genitive Plural: Signifies ownership

Conclusion: There are unrelenting variety of Latin first-declension patterns nouns but we have covered the most common typical ones. Of course there will be some exceptions and irregularities, nevertheless, that must be learned separately by consulting a comprehensive Latin grammar guide or dictionary for a more detailed understanding.
