**Abstract:** Today, the young generation wants to learn foreign languages, especially English interest is increasing. Therefore, this language is used in secondary schools a wide range of innovative methods from teaching staff for deeper teaching use is required. This paper explores effective methods for high school students to learn English tenses conveniently and engagingly. By integrating interactive activities, practical exercises, and technology, students can achieve a better understanding and retention of various tenses.

**Keywords:** Innovation, grammatical structure, lexical unit, phonetic changes, primary education.

Mastering English tenses is crucial for high school learners to develop their language skills. However, traditional teaching methods can often be tedious and ineffective. This paper proposes several innovative strategies to make learning tenses more accessible and enjoyable. The desire to learn a language is very high in young children, especially. With today's information and communication tools, this situation is high indicators showing. Conditions and education created in schools by our state the rooms are equipped with modern technologies, with young educated personnel provided, all classes for independent study except for school teachers thanks to the organization of television online classes on online TV channels you deserve.

Interactive Activities:

1. Games: - Online Games: Platforms like Kahoot, Quizizz, and Duolingo offer engaging games focused on tense practice. - Board Games: Custom-made board games where students advance by correctly using different tenses.
2. Quizzes: Regular Quizzes: Short, frequent quizzes to reinforce learning. Peer Quizzes: Students create quizzes for each other, promoting collaborative learning.
3. Flashcards: Digital Flashcards: Apps like Anki and Quizlet allow students to practice tenses on the go. Physical Flashcards: DIY flashcards with different tenses and example sentences for quick review.

Practical Exercises: Writing Prompts: Encourage students to write short stories or essays using specific tenses. Role-Playing: Simulate real-life scenarios where students must use various tenses correctly. Group Discussions: Organize discussions on various topics where students practice different tenses in conversation. Elementary school students learn grammatical, lexical, phonetic, units of the language they may not understand, but through cartoons, games, pictures, the language is excellent can master. Accordingly, two methods are useful in grammar is used:

- Inductive
- Deductive

Grammatical rules are first explained to the students in the inductive method reinforced by examples. This method is mostly for high school students useful. For example, tenses, prepositions, articles are known for high school students as terms, they are possessive in sentences, determining participles, complements, and cases they can put the pieces together to form a sentence. First known games and exercises in the deductive method through which the subject is introduced and then explained according to the rule. Elementary class students have

information about possessor, participle, verb and other units explaining the topic to them through games and songs due to their absence more efficient.

In our world today in social relations communication media (information technologies) require improvement of students' communicative skills, they differ in the process of interaction with other participants of the dialogue exchange ideas in situations, use language and speech norms correctly is enough. In such conditions, the main purpose of foreign language is communicative ability forming, that is, carrying out interpersonal and intercultural communication in a foreign language increase is required. By the end of the twentieth century, the world is in English the status of an important language was finally strengthened. Most of the world it became compulsory to learn it in schools and the teaching method was jump and began to develop with boundaries. The first way to learn English independently everyone has the opportunity to attend the courses that caused it to appear it's not. Another important aspect of teaching English is the state of the student to control the complete reception of information. Thoughts of children in a group imaginations, thinking, worldviews and receiving information will be different. That's it according to the teacher based on the characteristics of the character of each student should carry out the process.

**Technology Integration: Educational Apps:** Utilize apps specifically designed for learning tenses. **Video Lessons:** Use platforms like YouTube and educational websites for visual and auditory learners. **Interactive Websites:** Websites like Grammarly and Purdue OWL offer exercises and explanations on tense usage. Therefore, mentor-teachers are interactive, innovative and interesting methods they should organize lessons using it. Individually with students, introduction of working in groups and pairs in the form of various competitions lessons in the style of games, using colorful visual aids and they are required to prepare separately for each lesson. Such this type of lessons increases love and passion for the language, and inactive students activates, forms healthy competition among students. Competition the foundation of ascension.

From computers and other devices use determines the success of the entire educational process. In the process of education formation of speech and social skills in trainings. Sufficient attention should be paid to the development of flexibility. Besides. In education, the success of each lesson depends largely on the correct organization of the training depends on doing. The lesson is based on the creative cooperation of the teacher and the student must Only then will students be able to think independently and will be educated. As a result of the use of innovative methods in English language classes, students logical thinking skills develop, speech becomes fluent, quick and correct answer the ability to give is formed. Such methods arouse enthusiasm for knowledge in the student. The student tries to prepare thoroughly for the lessons. This is the education of students become active subjects of the process. The educational system is free-thinking, We will be in the future as we make it our mission to educate a well-rounded, mature person teachers learn ways to effectively use innovative technologies we can add our own contribution as we develop it more perfectly.

**Conclusion:** In conclusion, it should be noted that there are different classes of English in general education schools taking into account the age and psychological characteristics of students, to fully satisfy their interest and needs in learning a foreign language a modern lesson based on pedagogical innovative technologies teaching with the help of developments is highly effective for students to learn the language will give. By incorporating interactive activities,
